Evertint® WS

高分子染料－賦予產品無限色彩的最佳解方

TPolymeric Colorants－he Ultimate Solution for Infinite Colors

Everlight Chemical

在建立品牌識別、提升視覺美感或是創造產品差異化時，特定色彩往往扮演著關鍵角色，而永光化學Evertint® WS高分子染料正是為此而生的完美解決方案。相較於傳統染料與顏料，Evertint® WS 在品質穩定度、應用效能具備無可比擬的優勢，是洗衣洗劑、家庭清潔用品及公共/工業用化學品的理想首選。

優勢與產品特性	
液態高分子技術，操作無負擔	本產品呈現均勻的液體狀態，不僅易於操作與拿取，更能徹底免除傳統粉狀染料帶來的粉塵危害。
卓越抗染污能力，清洗超省力	有別於傳統的著色方式，Evertint® WS 即使在極高的添加濃度下，也能將對雙手肌膚、硬質表面、多數織物及生產設備的染色殘留風險降至最低。若有濃縮原液沾染，僅需使用冷水即可輕鬆清理乾淨。
百分之百水溶，色澤透明亮	由於本產品在水中能形成真正的溶液，而非乳濁液或分散液，這使得最終配方的外觀更加清澈、璀璨且充滿明亮感。
高濃度添加與寬廣pH適應性	得益於完全水溶的特性，即使在水性配方中拉高色彩濃度，也不會產生沉澱析出。同時，產品能適應極其寬廣的酸鹼(pH) 範圍，滿足各類特殊配方需求。

◆ 全方位技術支援與客製化調色

卓越的色彩一致性 我們承諾提供業界頂尖的色彩穩定度，確保每一批次、每一筆訂單的品質始終如一。

精準對色建議 歡迎運用我們技術服務部門的專業知識，找出最符合您配方需求的完美色調。

若您需在實驗室自行進行配色與測試，我們建議：

- 參考產品的 pH 穩定性圖表，以評估其在您應用中的合適度。
- 以蒸餾水將染料配製成1%的溶液，讓後續的秤重與調色過程更加精確與便利。
- 根據目標色澤，彈性調整染料的色調與添加強度。

◆ Evertint® pH值穩定性

本圖表旨在預估各種著色劑在不同pH值下的色調與穩定性。因可能與您產品配方中的其他成分產生相互作用，實際的色彩與穩定性可能會有所差異。

永光化學建議在您的配方中對 Evertint 染料進行測試，以確認實際的色彩表現與穩定性。如需進一步的技術支援，歡迎隨時垂詢。

◆ Evertint® pH Stability Test

	pH1	pH2	pH3	pH4	pH5	pH6	pH7	pH8	pH9	pH10	pH11	pH12
Evertint Blue WS-01 - Suitable for pH 2–9, do not use in strong alkaline formulations (pH 10–12)												
Evertint Yellow WS-01 - Suitable for acidic formulations (pH 2–6), avoid neutral or alkaline products												
Evertint Violet WS-01 - Suitable for pH 2–8, avoid strong alkaline products												

When establishing brand identity, enhancing visual appeal, or creating product differentiation, specific colors often play a crucial role. Everlight Chemical's Evertint® WS polymeric colorants are the perfect solution designed precisely for this purpose. Compared to traditional dyes and pigments, Evertint® WS offers unparalleled advantages in quality stability and application performance, making it the ideal choice for laundry products, household cleaners, and institutional/industrial chemicals.

Advantages & Features	
Polymeric Liquid Technology, Effortless Handling	This product is a homogeneous liquid, making it not only easy to use and handle, but also completely eliminating the dust hazards associated with traditional powder dyes.
Non-staining, Effortless Cleanup	Unlike traditional coloration methods, Evertint® WS minimizes staining on hands, hard surfaces, most fabrics, and equipment, even at high color loadings. Concentrated colors can be easily cleaned up with cold water.
100% Water-Soluble for Crystal Clear Colors	Because this product forms true solutions rather than emulsions or dispersions, the final formulations are clearer and more brilliant in appearance.
High Color Loading & Wide pH Adaptability	Due to their complete water solubility, a high concentration of color can be achieved in water-based formulations without precipitation. Furthermore, the product is suited to an extremely wide pH range, meeting the needs of various specialized formulations.

◆ Comprehensive Technical Support & Custom Color Matching

Unmatched Color Consistency We commit to providing industry-leading color stability, ensuring consistent quality batch after batch, and order to order.

Precise Color Matching Guidance We welcome you to leverage the expertise of our technical services department to find the exact hues required for your formulations.

If you need to perform your own color matching and testing in the lab, we recommend:

- Refer to the pH stability chart to evaluate its suitability for your application.
- Prepare a 1% solution of the colorant in distilled water to allow for more accurate and convenient subsequent weighing and color matching.
- Flexibly adjust the shade and color strength according to your target shade.

◆ Evertint® pH Stability

This chart is intended to approximate the shade and stability of various colorants at different pH levels. Actual color and stability may vary due to possible interactions with other components in your product formulation. Everlight Chemical highly recommends testing Evertint® Colorants in your formulations to determine actual color and stability. Further technical assistance is available upon request.

	pH1	pH2	pH3	pH4	pH5	pH6	pH7	pH8	pH9	pH10	pH11	pH12
Evertint Violet WS-02 - Suitable for pH 2–8, avoid strong alkaline products												
Evertint Magenta WS-01 - Suitable for pH 2–12, increase dosage to achieve color depth if used at pH 1												
Evertint Blue WS-02 - Suitable for pH 2–12, avoid use at pH 1												

The information and recommendations provided are reliable to the best of our knowledge. Users should perform their own tests to determine the suitability of a product for their own particular purposes.
